

Meet our team

Thinking beyond and improving products, services and processes is the core of the Consulting business and makes the life of every Consultant very exciting and dynamic. I have been shaping my career through different consulting projects in the manufacturing industry globally where I met inspiring people and learned a lot. Nowadays I would like to transfer my knowledge to young and talented people that are eager to learn and make an impact on the most challenging topics of tomorrow.

Dr. Advan Begović (Co-founder & Co-CEO)

Being a business consultant can be very challenging due to the nature of the profession. However, it represents a unique opportunity to act in a rapidly changing environment, collaborates with fantastic customers and colleagues, and constantly learn new things. I am truly glad that CBC is able to provide such a growth path to young talents and experienced professionals in my home country.

Amar Begović (Co-founder & Co-CEO)

Having a positive impact on the clients, businesses, society and especially impacting the future of tomorrow is what CBC stands for and this is my personal goal as well. One of the most important skills in all the work consultants do is "listening and forward-thinking", which I consider one of my strongest skills. By listening and collaborating with our clients – and applying empathy and agility – you explore tailor-made solutions together. I am glad to be a part of CBC team and the future successes we will make together.

Amina Čabaravdić-Krivdić (Consultant)

My passionate interest in automotive and modern technologies in this area was the main motive for joining the CBC team. I am proud to work for internationally known automotive companies, with which CBC has rich references for accomplished projects. I am inspired by the imagination that through my daily work I participate in digital product development projects that will be used in the future by millions of people worldwide.

Said Smajević (Consultant)

About Circuit Business Consulting

CBC was founded in Sarajevo, Bosnia and Herzegovina, by two enthusiasts with multiple years of experience in the German industry and leading management positions.

Our mission is to provide **innovative and cutting-edge solutions** to our clients in the field of automotive. We strongly believe that our cooperation with international, industry-leading companies will motivate young talents and experienced professionals to build their careers in Bosnia and Herzegovina.

Why join CBC?

Trust, honesty, and team spirit are our core values, and we stand for equal chances for everyone. CBC provides an **innovative, open, future-driven, and agile working environment**, which is unique in the Western Balkan region.

In order to create a positive impact as a team our consultants and their personal development are our main internal focus. That's why every CBC team member is able to contribute to the growth of CBC directly, while CBC ensures a personal growth path for each team member.
